

## Finding Factors

**Factors** are multiplied to create a **product**. There are only a certain number of **factors** for each **product**.

**Example:** The factors of 24 would be... 1,2,3,4,6,8,12,24

You can make your factors smile; that way you won't forget any!

Now try these and check your answers by making them smile! What do you notice about the last number?

1. Factors of 16 = \_\_\_\_\_

2. Factors of 28 = \_\_\_\_\_

3. Factors of 10 = \_\_\_\_\_

4. Factors of 35 = \_\_\_\_\_

5. Factors of 33 = \_\_\_\_\_

6. Factors of 60 = \_\_\_\_\_

7. Factors of 22 = \_\_\_\_\_

8. Factors of 17 = \_\_\_\_\_
