

Making Multiples

A **multiple** can be made by **multiplying** a number. It's that easy!

For Example: multiples of 6 include...6,12,18,24,30,36...

$$1 \times 6 = 6, 2 \times 6 = 12, 3 \times 6 = 18, 4 \times 6 = 24, 5 \times 6 = 30, 6 \times 6 = 36$$

20 is not a **multiple** of 6 since there is no **whole number** that we can **multiply** by 6 to make 20.

Find all the **multiples** of these numbers up to 50

1. Multiples of 4 = _____

2. Multiples of 8 = _____

3. Multiples of 9 = _____

4. Multiples of 11 = _____

5. Multiples of 14 = _____

Find all the multiples of these numbers up to 100

6. Multiples of 30 = _____

7. Multiples of 35 = _____

8. Multiples of 40 = _____

9. Multiples of 45 = _____
